

Cimretard LS P

Delaying product for cast slabs

Cimretard LS P has been specially developed for self-levelling cast slabs as developed by Italcementi.

Adding this product acts on the binder's hydration effects for accelerated concrete hardening.

CHARACTERISTICS

- Powdered product
- Desiccation loss: 7.5 to 9%
- Cl- : 0.1%
- pH (50 g/l in 20°C water) : 1.75 - 1.95

INSTRUCTIONS FOR USE

Cimretard LS P will preferably be mixed in with other mortar or concrete components before adding water.

FIELDS OF USE

Cimretard LS P is used for self-levelling cast slabs as developed by Italcementi and is not compatible with any other applications.

DOSAGE

Cimretard LS P dosage levels must first be tested and adjusted before they are applied industrially. They are dependent on formulation and on the desired characteristics. Axim's Technical Department is at your service to provide assistance with this aspect.

SAFETY

- In case of contact with eyes or skin, rinse abundantly with water.
- Use a dust mask when working with the product.
- We recommend wearing goggles and gloves when handling the product.
- In all cases, always refer to the Safety Datasheet.
