

Cimaccel LS P

Accelerator product for cast slabs

Accelerator product for cast slabs **Cimaccel LS P** has been specially developed for self-levelling cast slabs as developed by Italcementi.

Adding this product acts on the binder's hydration effects for accelerated mortar hardening.

CHARACTERISTICS

- Powdered product
- Desiccation loss : < 0.7%
- Cl- : ≤ 0.1 %
- pH (5 g/l à 20°C) = 10 - 11

INSTRUCTIONS FOR USE

Cimaccel LS P will preferably be mixed in with other mortar or concrete components before adding water.

FIELDS OF USE

Cimaccel LS P is compatible with all cements (Portland and aluminous sulphate varieties).

DOSAGE

Cimaccel LS P dosage levels must first be tested and adjusted before they are applied industrially. They are dependent on formulation and on the desired characteristics. Axim's Technical Department is at your service to provide assistance with this aspect.
